## Innovation @ Intel China

Intel China is the largest product and technology R&D center outside of the United States. We employ more than 7,500 professionals, who are among the best and brightest in their areas of expertise.

Together, our team invented the brand new lowest-power secure SoC, powered the world's leading PCs and established China's first IA-based HD media center.

Having established the Intel Capital China Innovation Fund, Intel Cloud Innovation Centre and the first Intel Smart Device Innovation Centre in Shenzhen, Intel aims to further boost China's innovation in the global market.

Such efforts have been rewarded. Intel has won numerous prestigious awards including the Top 100 Global Innovators by Thomson Reuters, Most Innovative Companies by Economic Observer and The Most Innovative Companies by IT Times.
